

## Herbal Treatment for Animals by Mr. Kumar

### 1. Animals suffering with Double tongue

Cattle if suffers with *Irattai Naakku* (double tongue with extra growth of inner tongue) and it will be considered as serious disease in cattle by local people. For this take tamarind fruit , Chilli fruits and little common salt and all are taken together and rub this over the tongue. After that he administers bolus of *Aeroplan chedi* or *Kattapoondu* or *rayil poondu* (Croton spiciflorus) by pounding 2 of these plants . The plant is taken at two hand ful and gently pounded and a small bolus is prepared and administered orally .

*rayil poondu*

### 2. For Animals not taking feed

Bark of Naval (Jamun), Iluppai (Bassia longifolia) and plants of Visakkali (Gymnema montana ?) are to be pound together and mixed in water and administered orally in empty stomach.
